

LH3S-LED

LINEAR HIGHBAY

Small in size, big in performance.

The **LHS-LED Series** of linear highbay luminaires is highly versatile with industry leading selectable features and a high lumen package while keeping a compact design and contractor-friendly installation.

Its durability and high efficiency make it ideal for illuminating a wide range of industrial and commercial facilities and is an optimal one-to-one replacement for conventional lighting systems such as HID and fluorescent.

Enhanced 320W delivers a higher lumen output, ensuring **brighter and more efficient lighting for larger spaces.**

The New LH3S Features:

Colour Temperature
Selectability

Wide
Voltage

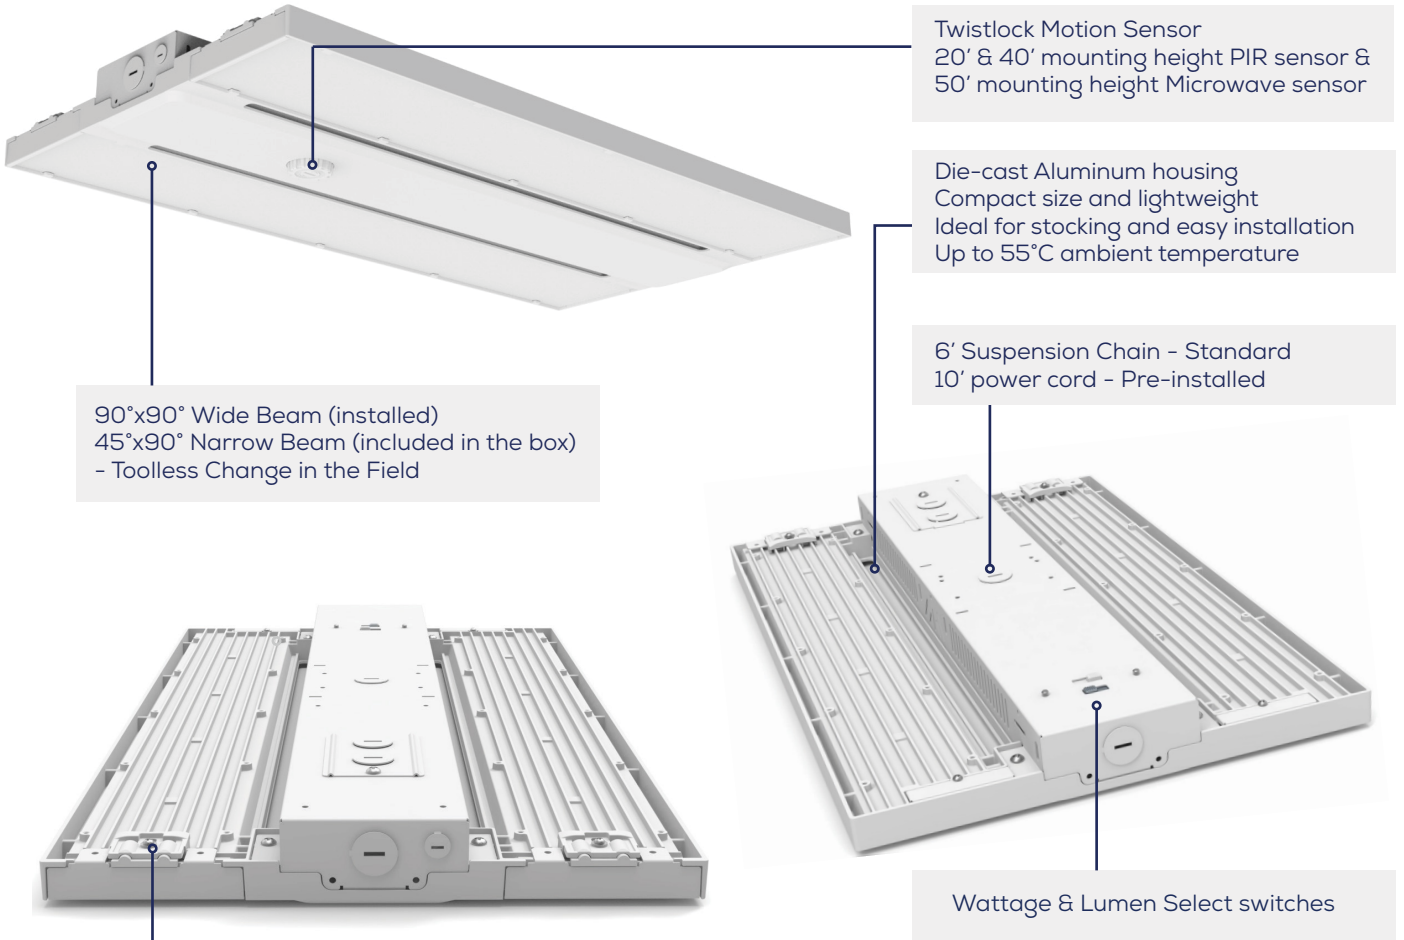

Changeable
Distribution

Affordable

Features & Benefits

Leading edge technology with tool-less change of optics right out of the box.
