

LH3S-LED

LINEAR HIGHBAY

Small in size, big in performance.

The **LHS-LED Series** of linear highbay luminaires is highly versatile with industry leading selectable features and a high lumen package while keeping a compact design and contractor-friendly installation.

Its durability and high efficiency make it ideal for illuminating a wide range of industrial and commercial facilities and is an optimal one-to-one replacement for conventional lighting systems such as HID and fluorescent.

Enhanced 320W delivers a higher lumen output, ensuring **brighter and more efficient lighting for larger spaces.**

The New LH3S Features:

Colour Temperature
Selectability

Wide
Voltage

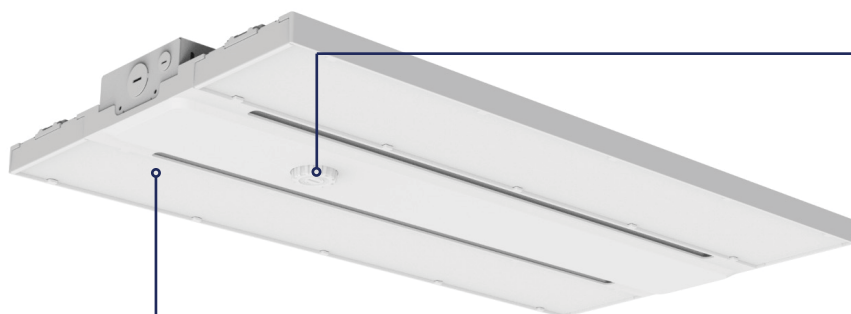

Changeable
Distribution

Affordable

Features & Benefits

Leading edge technology with tool-less change of optics right out of the box.

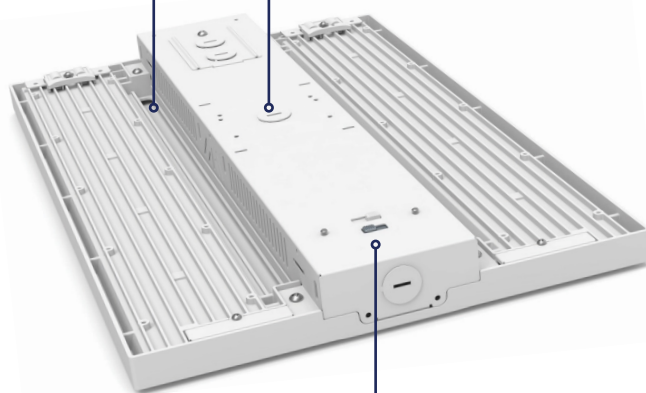

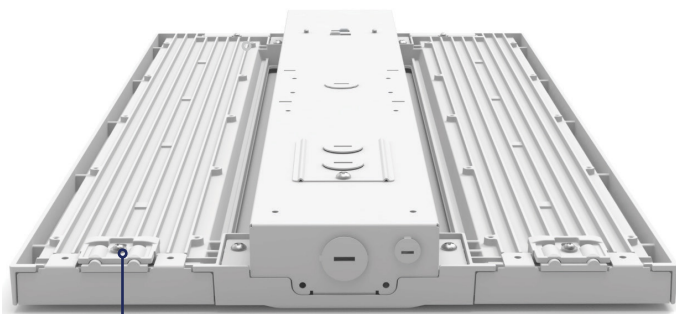

Twistlock Motion Sensor
20' & 40' mounting height PIR sensor &
50' mounting height Microwave sensor

Die-cast Aluminum housing
Compact size and lightweight
Ideal for stocking and easy installation
Up to 55°C ambient temperature

6' Suspension Chain - Standard
10' power cord - Pre-installed

90°x90° Wide Beam (installed)
45°x90° Narrow Beam (included in the box)
- Toolless Change in the Field

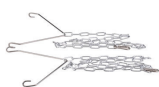

Wattage & Lumen Select switches

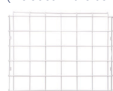

Toolless Optic Swap

Accessories

6' Suspension Chain
A pair of V-hooks
(Included in the box)

Wire Guard

10' Aircraft Cable

120-347V
Emergency Back Up

Pendant Mount

Motion Sensor

Surface Mount

Remote
