

RAB DESIGN Retrofit Troffers

RFT-LED Series

RAB DESIGN's RFT Retrofit Kit fits most existing troffers, making it easy to modernize outdated fluorescent fixtures without the cost and hassle of a full fixture replacement. Keep the existing housing, avoid working around HVAC, and reduce waste while upgrading to efficient LED performance. Less cost, less hassle, less waste. More LED performance.

Keep the Housing. Upgrade the Light.

✓ Field Adjustable Control

- Selectable CCT: Choose between 3500K/4000K/5000K.
- Lumen Output: Adjust from 2900 lm - 7500 lm.
- Universal Voltage: Compatible with 120-347V.

✓ Simple-to-Install

- Remove old fluorescent tubes and ballast.
- Attach side brackets to the housing.
- Hang the retrofit troffer and complete the wiring.
- Close and latch the door to complete installation.

✓ Available in Three Sizes

Offered in 1x4, 2x2, and 2x4 configurations.
