

## BWR-5 LED DOWN LIGHT

*The BWR-5 Down light uses 6 LED's, each at 1.2 watts and are rated 50,000 hours.*

*LED's use less electricity and have longer life than traditional lamps, thereby providing both electrical and maintenance cost savings. LED's are available in white, blue, red, yellow or green. Unit comes complete with integral transformer. The BWR-5 is ideal for use both indoors and outdoors. Great for accent lighting.*

**MOUNTING PLATE** Aluminum with a powder coat paint finish. Mounts to standard octagon box.

**ARM** Extruded aluminum with powder coat paint finish. The arm also houses the transformer.

**HOUSING** Extruded aluminum with powder coat paint finish.

**LED DRIVER** 120 volt electronic consistent light output and operating down to -40°C.

**LED ASSEMBLY** Circular array with 6 LED's with secondary optics. Optics available in narrow medium and wide beam. Total output wattage 7.2 watts. LED's are available in white, red, blue, yellow or green.

**LENS ASSEMBLY** Die cast aluminum held in place with 3 stainless steel screws. The lens is clear tempered glass, 4mm thick. The lens assembly has two O-ring silicone gaskets.

**FINISH** Standard finishes are black, white and architectural bronze. For custom colours please consult factory.

**RATING** IP55
