

DYANA HID - BY THORN

The Dyana is a modern distinctive slim fixture with high performance, energy efficiency and versatility with easy maintenance. The Dyana is available in two sizes allowing designers to make the best choice for any project with mounting heights between 5 and 10 metres and a choice of mounting brackets. The post top mounting option can allow the fixture to be tilted. The optics on the Dyana can be adjusted in the field by changing the adjustable lamp socket setting. The fixtures are available in metal halide up to 250 watts using electronic ballasts, and also allows for the use of the Philips Cosmopolis system up to 190 watts. The Dyana can be used for residential complexes, pathways, roads and business complexes.

BODY / ARM MOUNT Die cast aluminum with a textured dark grey powder coat finish.

CANOPY Spun aluminum with a textured dark grey powder coat paint finish.

LENS Clear tempered glass with a continuous gasket.

REFLECTOR High purity anodized aluminum.

BALLAST All ballasts are electronic. Standard metal halide are available in 120-277 or 347 volts. Cosmopolis ballasts are available in 120-277 volts only.
