

MINI PACK

The Mini Pack is ideal for small commercial buildings, strip malls and warehouses. The unit features a prismatic polycarbonate lens and a cast aluminum back.

BACK HOUSING Cast aluminum housing with a polyester powder coat finish. The housing has conduit entries on the side and mounting on the back directly to a 4" outlet box.

REFLECTOR Diffused aluminum reflector.

LENS Prismatic polycarbonate lens with the hinge on the bottom. Lens is held in place with four stainless steel screws. The lens has a continuous silicone gasket to seal out contaminants.

BALLAST All ballasts are 120 volt normal power factor or high power factor. Available in 35, 50, 70 or 100 watt High Pressure sodium. Also available in 42 watt CFL electronic ballast in 120/277 or 347 volts.

LAMP All units come complete with lamp.

FINISH Polyester powder coat finish. Available in bronze only.

SOCKET Medium base 4KV pulse-rated socket with a nickel-plated screw shell and a spring-loaded centre contact for High Pressure Sodium lamps. For CFL option GX24q thermo plastic socket.

OPTIONS Photocell.
