

## ELECTRA

*The Electra is an ideal fixture for use on the facade of a building or interior wall to provide accent lighting. The Electra provides both up and down light in a bow tie pattern.*

**HOUSING** The housing is a two-piece design made of cast aluminum held together using four stainless steel screws.

**REFLECTOR** Two piece hammer tone aluminum reflector.

**LENS** The Electra has a upper and lower lens made of tempered glass. Each lens is secured in place with a silicone rubber gasket.

**BALLAST** All ballasts are electronic 120 volts available in 70watt Metal Halide.

**SOCKET** Porcelain double ended socket, spring loaded RX7s.

**LAMP** Double ended ceramic Metal halide, lamp included.

**FINISH** Powder coat paint finish available in white or black.
