

## SL-LED SERIES

### LED STRIP LIGHT

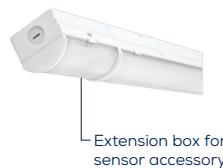

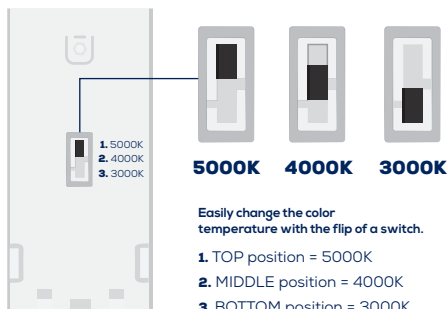

### Easily Change Colors With the Flip of a Switch:

- Fixture can be set at a color temperature of 3000K, 4000K or 5000K while installing through a switch inside the housing.
- Narrow, linear design with frosted lens for uniform light distribution.
- Connect multiple fixtures in series using the easy connector steel plate.

### Variable Color Switch:

The switch is located inside the fixture.

### IDEAL FOR

**Shops**

**Cove Lighting**

**General Area Lighting**
