

CEILING AND WALL MOUNT

VXBR1

Two-piece, heavy-duty die cast aluminum with 1/2" or 3/4" NPS threaded hubs. Unit can be wired directly or mounted to a junction box.

Threaded cast aluminum guard with set screw.

VX1

Standard unit comes with prismatic clear heat resistant globe. Also available with red, blue, green or amber globes.

Standard natural aluminum shown.

Natural aluminum is standard.
Also available in other colours.

DESCRIPTION

Available in low wattage LED configurations to maximize energy savings
Precision die cast aluminum housing
Suitable for wet locations
All RAB[®] Design Lighting LED luminaires are mercury and UV free
LED will deliver 70% of its initial lumen for a minimum 50,000 hours of operation

APPLICATION

Ideal for industrial applications, retail locations or any area requiring an industrial look.

*** Fluorescent configurations are also available (see reverse)**

LED

EXCELLENT LED LUMEN PERFORMANCE

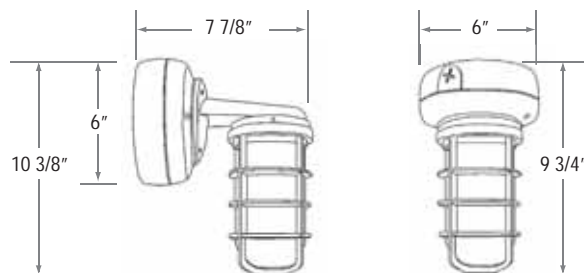

Highly efficient heat sink maintains the junction temperature significantly below the recommended maximum ratings which allows the fixture to maintain 70% of initial lumens for at least 50,000 hours, well beyond the useful life of traditional incandescent light sources.

HIGHLY EFFICIENT LED

The Ceiling or Wall Mount LED vapourproof fixtures use fully tested high quality Philips Rebel LEDs that produce a minimum of 1458 lumens (14W).

Standard colour is a natural white 4000K, consult factory for other colour temperatures.
